

*Secure data transmission for all communications is ensured by these industry protocols

Solution's elements

1 SMARTAir® TS1000 Software and Openow™ License

- For the correct operation of the Openow solution, it is necessary to have the TS1000 SMARTAir license installed. The license needs to be 6.08 version or higher and the Openow functionality needs to be enabled.
- There are two types of licenses compatible with the Openow solution:
 - Offline
 - Wireless Online
- The Openow license needs to be yearly renew so all Openow services can be available.

2 Openow™ App

- The Openow App is available for Android and iOS operating systems and the download is free through the different platforms.

3 SMARTAir® door devices

- The Openow solution is compatible with the escutcheons, cylinders and wall readers of the SMARTAir range that have an Openow module.
- There are 2 types of modules:
 - Openow module
 - Wireless Online & Openow module

Openow is SMARTAir's mobile solution, that allows any user of an access control installation to have their virtual key directly in their Smartphone.

The facility or security managers can immediately send, update or revoke the virtual keys from the SMARTAir TS1000 management software for maximum control of the installation.

System functionality

For facility and security managers

- The manager is able to send, update and revoke virtual keys immediately over the air.
- The sending, update or revocation of the virtual key is directly done via the TS1000 management software or Web manager.
- From the TS1000 management software or Web manager the facility manager can directly check if the Openow app is correctly installed in the users' Smartphone and that the registration process has been successfully completed.

For users

- The user will have the Openow App in his/her Smartphone or device.
- The App allows to have more than one virtual key from different SMARTAir installations.
- The App allows to set up a security PIN to protect the use of it.
- For more information on the instructions for download and use of the Openow App visit the following link:
